

# Compact Laser Engraving and Cutting Machine

This is a compact laser engraving and cutting machine designed for hobbyists, small businesses, and educational purposes. It is capable of engraving and cutting various materials like wood, acrylic, and plastics.

## Overview

### Compact Laser Engraving and Cutting Solution

This compact laser engraving and cutting machine is an ideal solution for hobbyists, small businesses, and educational environments. It combines precision engraving and cutting capabilities for materials like wood, acrylic, and plastics within a space-saving design. Equipped with an intuitive control panel and safety-first features, it provides a reliable and efficient workflow for various creative and production tasks.

## Performance Metrics

### Key Features

- Compact footprint
- Transparent viewing window
- Adjustable laser power
- Adjustable laser speed

<b>Supported Materials</b>	Wood, Acrylic, Plastics
----------------------------	-------------------------

## Safety & Operation

### Safety Features

Emergency Stop • Transparent Viewing Window

<b>Operational Requirements</b>	Requires proper ventilation and adherence to safety precautions during operation.
