

Compact Personal Space Heater

This compact heater is designed for personal space heating. It features an adjustable thermostat, overheat protection, and a tip-over switch for safety.

Product Overview

Compact Personal Heating Solution

This portable PTC space heater is designed for efficient personal climate control in any environment. Equipped with an advanced ceramic heating element, it offers consistent heat output with three distinct settings. Enhanced with integrated safety features including an overheat protection system and a tip-over switch, it provides both comfort and peace of mind for professional or personal workspaces.
