

Compact Rice Harvesting Machine

This compact agricultural machine is designed for harvesting rice in small to medium-sized fields. It cuts and separates rice grains from the stalks using a cutting mechanism and threshing unit.

Overview

Compact Rice Harvesting Machine

This compact harvesting machine is engineered for high-efficiency operation in both rice and wheat fields. Designed for comfort and ease of use, it features a ride-on configuration that simplifies the harvesting process for operators. Its robust design ensures excellent adaptability, allowing it to perform reliably in challenging conditions, including deep-water and sludge-heavy fields.

Technical Specifications

Crop Height Range	300mm - 1400mm
Field Compatibility	Rice Fields, Wheat Fields, Deep-water Fields, Sludge Fields

Performance Features

Operational Highlights

1 Pass

Operation Type

Operational Benefits

- High efficiency operation
- Easy to learn and operate
- Quick debris removal
- Ride-on design for operator comfort

Maintenance and Safety

Maintenance & Safety

Safe & Reliable • Easy Disassembly • Quick Maintenance
