

Compact Space Heater with Adjustable Settings

This space heating apparatus is compact and portable, designed for efficient and targeted heating. It includes adjustable temperature settings and oscillation for wider heat distribution, along with a safety mechanism for automatic shut-off.

Overview

Compact and Efficient Heating Solution

This compact space heating apparatus is engineered for efficient, targeted warmth in various environments. It features adjustable temperature settings and oscillation capabilities to ensure optimal heat distribution throughout the room. Designed with safety in mind, the unit includes automatic shut-off mechanisms for both overheating and tipping, providing peace of mind during operation.

Performance

Heating Features

- Adjustable temperature settings
- Oscillation for wider heat distribution
- Targeted heating

Safety & Design

Usability

- Digital display
- User-friendly controls
- Lightweight and portable

Safety Mechanisms

Overheat Protection, Tip-over Protection, Automatic Shut-off
