

Compact Thermoelectric Refrigerator with Transparent Door

This compact personal refrigerator is designed for convenient storage of beverages and snacks in small spaces. It features a transparent window for easy viewing and includes a removable shelf and carrying handle.

Product Overview

Compact Cooling Solution

This compact thermoelectric refrigerator is specifically designed for convenient storage in space-constrained environments such as offices, dorm rooms, or personal workspaces. The integrated transparent door provides immediate visibility of contents, while the internal removable shelf allows for flexible organization of beverages and snacks. Engineered with a thermoelectric cooling system, the unit operates with high efficiency and minimal noise, making it an ideal choice for quiet professional settings.
