Overview

Compact Vacuum Sealing Solution

This mini vacuum packaging machine offers a space-saving, efficient solution for preserving food, textiles, and sensitive items. Utilizing advanced microcomputer program control, it effectively removes air to inhibit bacterial growth and reduce packaging volume for easier storage. Its compact design and reliable performance make it an ideal choice for both household use and small-batch commercial applications.

Technical Specifications

Material Input/Output	Forward right output mode
Heating Method	Fixed instantaneous heating (hot box)
Production Suitability	Small batch production, Medium production, Assembly line compatible
Component Origin	Imported parts (Taiwan, Japan, South Korea)

Features

Key Features

- Microcomputer program control operation system
- Uniform heat distribution via special electric heating
- Space-saving compact design
- Energy-saving operation
- Compatible with composite film and aluminum foil bags

Suitable Applications

Food preservation • Textile storage • Chemicals • Electronic components • Precision instruments • Rare metals

Operations

Control Interface

- Seal / Pause
- Vacuum seal / Pause
- Exhaust / Open
- External vacuum accessory inlet
