

Compact Wheel Loader

This loader is engineered with modern design methods and the latest technology. It offers four forward gears and two reverse gears, along with a high dumping height, making it suitable for handling bulk materials.

Product Overview

High-Efficiency Compact Wheel Loader

This compact wheel loader is engineered for high performance and reliability in demanding work environments. Featuring an optimized wheelbase and extended boom design, it provides excellent stability and loading capability. Built with advanced structural analysis, this machine ensures durability, efficient ground contact on rugged terrain, and versatile application options.

Technical Specifications

Drivetrain Configuration

- Fixed shaft transmission
- Single turbine torque converter
- 4 Forward gears
- 2 Reverse gears

Overall Dimensions	5930 x 2078 x 2850 mm
Operating Weight	6200 kg
Standard Bucket Capacity	1 m3
Wheelbase	2270 mm

Performance Metrics

Key Performance Indicators

60 kW

Rated Power

2400 rpm

Rated Speed

Loading Performance Table

Metric	Standard Boom	Long Boom
Dumping Reach (mm)	850	865
Dumping Height (mm)	2460	2850

Optional Equipment

Available Attachments	Bale grab, Underground attachment, Side dumping bucket
