

Compactor Hydraulic Cylinder

This high-performance cylinder is designed for compactors. Its precision-engineered design ensures reliable operation and extended service life, enhancing the compactor's overall efficiency.

Overview

High-Performance Hydraulic Cylinder

This hydraulic cylinder is precision-engineered for use as a replacement component for Wacher 80 impact compactors. Designed for demanding industrial applications, it emphasizes robust construction to ensure reliable operation and extended service life. By maintaining optimal performance, this component contributes directly to the efficiency of your equipment, supporting high power output while promoting lower fuel consumption and reduced emissions.

Compatibility

Compatible Equipment

Wacher 80, Impact Compactor

Performance

Operational Benefits

- High power output
- Low fuel consumption
- Low emission profile
- Efficient heat dissipation
- Robust construction
