

Complete Rice Milling Plant

The 6NT-30-80 series is a complete rice milling equipment set. It integrates cleaning, husking, separating, milling, and polishing stages for efficient rice processing.

Product Overview

6NT-30-80 Series Rice Milling System

The 6NT-30-80 series represents a complete, integrated solution for industrial rice processing. This system encompasses the full workflow from initial cleaning and husking to separation, milling, and final polishing, ensuring high-quality output with minimal grain breakage. Designed for medium to large-scale facilities, it offers robust construction and user-friendly controls to streamline operation and maintenance.

Technical Specifications

Integrated Processing Stages

- Cleaning
- Husking
- Separating
- Milling
- Polishing

Series Model

6NT-30-80

Ideal Scale

Medium-scale processing, Large-scale processing

Performance Features

Operational Highlights

Minimal grain breakage • Robust construction • Customizable configuration • User-friendly controls
