

Computer Peripheral Mounting Clip

This is a mounting clip designed for use with computer peripherals. The clip provides a secure method for attaching accessories to a computer setup.

Product Overview

Versatile Mounting Solution

This computer peripheral mounting clip is designed for secure and efficient organization within electronic hardware assemblies. Featuring a durable, wing-like plastic construction, it provides a stable guide for components on white-frame structures. Its specialized shape ensures reliable positioning, making it an essential component for system integration and cable management.

Physical Characteristics

Color

White

Material

Plastic

Design Features

Wing-shaped, Rounded top, Mounting guide

Application

Primary Application

Computer peripheral and electronic hardware mounting
