

Computerized Auto Thread Trimming Sewing Machine

This computerized sewing machine is designed for automated thread trimming. It features a user-friendly LCD control panel for adjusting sewing parameters.

Product Overview

High-Efficiency Sewing Solution

This computerized auto thread trimming sewing machine is engineered for precision and productivity in garment, shoe, and accessory manufacturing. It features an intuitive control panel with an LCD display, allowing operators to easily adjust sewing parameters for consistent, high-quality results. Built for stability and performance, this machine streamlines sewing operations to support demanding production environments.
