

Concrete and Asphalt Cutting Saw

This cutting saw is engineered for cutting concrete and asphalt. It features a gasoline engine, a water tank for dust suppression, and adjustable cutting depth.

ADDITIONAL IMAGES

Overview

High-Performance Cutting Solution

This robust cutting machine is engineered for heavy-duty construction applications, specifically designed to handle hard materials like concrete, asphalt, and stone. Featuring a powerful 13.5 HP gasoline engine, it delivers reliable performance on demanding job sites. The unit includes an integrated water-cooling system for dust suppression and extended blade life, along with adjustable depth controls for precise operation.

Technical Specifications

Engine Power

13.5 HP
Power Output

Suitable Materials

Concrete, Asphalt, Stone

Key Features

Operational Features

- Self-propelled design
- Water-cooling system for dust suppression
- Adjustable cutting depth control
- Ergonomic adjustable handles
- Wheel-mounted chassis for maneuverability

Safety & Durability

Safety & Build

Blade Guard • Robust Frame • Dust Suppression
