

Concrete Floor Saw for Asphalt and Concrete

This concrete floor saw is a robust machine designed for cutting concrete and asphalt surfaces. It features a powerful engine, adjustable cutting depth, and a durable blade guard for enhanced safety.

Product Overview

Professional Concrete Floor Saw

This robust floor saw is expertly engineered for precision cutting in both concrete and asphalt applications. Designed for demanding site environments, it provides reliable performance for road construction, pavement repair, and the creation of expansion joints. Its durable architecture ensures long-term operational stability for professional contractors.

Technical Specifications

Key Safety Features

- Durable blade guard
- Adjustable cutting depth control
- Reinforced structural design

Model	MLQ-16
Primary Applications	Concrete Cutting, Asphalt Cutting, Road Construction, Joint Sawing
