

Concrete Pavement Cutter

This pavement cutting machine is a robust tool designed for cutting hard surfaces like asphalt and concrete. It features adjustable cutting depth for versatile applications in road construction, repair, and maintenance.

Overview

Professional Concrete Pavement Cutter

This robust pavement cutting machine is engineered for high-performance cutting across asphalt, concrete, and other hard surfaces. Designed for stability and precision, it features a powerful engine and a durable frame to handle demanding road construction, repair, and maintenance projects. The integrated water cooling system effectively minimizes dust during operation while significantly extending the lifespan of the cutting blade.

Technical Specifications

Key Features

- Adjustable cutting depth for versatile applications
- Integrated water cooling system
- Durable cutting blade
- Sturdy frame for enhanced stability and precision

Primary Applications

Asphalt Cutting, Concrete Cutting, Road Construction, Road Maintenance, Surface Repair

Performance

Cooling System

Water-cooled • Dust reduction
