

Concrete Pump Truck

This concrete pump truck is designed for efficient and reliable concrete placement. Its multi-section boom provides extended reach and precise control on construction sites.

Overview

High-Performance Concrete Placement Solution

This concrete pump truck is engineered for superior efficiency and reliability in demanding construction environments. Featuring a multi-section boom system, it provides extended reach and precise control for complex placement tasks. The robust chassis ensures stability during operation, while the advanced hydraulic system guarantees smooth and consistent concrete delivery for a wide range of applications.

Technical Specifications

Boom Reach	46 m
Engine Power	420 hp

Features

Key Capabilities	Multi-section boom, High-stability chassis, Precision hydraulic control, Consistent pumping action
------------------	--

Performance Metrics

Operational Highlights

46 m Max Boom Reach	420 hp Engine Output
