

Concrete Rake for Spreading and Leveling

This concrete rake is designed for spreading and leveling concrete. It features a durable steel head and a long wooden handle for comfortable use.

Product Overview

Heavy-Duty Concrete Rake

This heavy-duty concrete rake is specifically engineered for efficient spreading and leveling of concrete on construction sites, driveways, and patios. Constructed with a durable 50Mn steel head and a robust A-grade hardwood handle, it offers the reliability required for professional building environments. The tool is designed to withstand rigorous daily use while ensuring precise material distribution.

Construction & Materials

Head Material	50Mn Steel
Handle Material	A-grade Hardwood, Ash Wood, Pine Wood
Heat Treatment	No

Usage & Application

Primary Application

Construction • Building Site • Concrete Leveling

Logistics & Packaging

Packaging Specifications

Unit	Packaging Type
1 Piece	Plastic Bag
6 Pieces	Woven Bag
