

Concrete Surface Finishing Machine

This finishing machine is designed for smoothing and leveling concrete surfaces. It features a rotating blade system enclosed within a protective cage and an adjustable handle.

Product Overview

Professional Concrete Finishing

The BPM-80 is a robust and efficient finishing machine specifically engineered for smoothing and leveling concrete surfaces. Designed with a powerful engine and a protected rotating blade system, it ensures reliable performance and safety on demanding job sites. Its compact, durable construction allows for excellent maneuverability in confined spaces, making it a versatile tool for various concrete finishing applications.

Technical Specifications

Design Benefits

- Compact design for confined spaces
- Durable materials for job site longevity
- Ergonomic handle for operator comfort
- Consistent surface leveling results

Model Identifier	BPM-80
Key Features	Robust Engine, Rotating Blade System, Protective Safety Cage, Adjustable Handle
