

Containerized Diesel Generator Set

This generator set is encased within a durable container, offering protection and easy portability. It features a high-performance diesel engine and efficient alternator for stable power output.

Product Overview

Robust Containerized Power Solution

This containerized diesel generator set is engineered to provide reliable, high-performance power for demanding environments such as remote locations, construction sites, and emergency backup scenarios. Encased in a durable, weatherproof container, the unit is protected from the elements while offering simplified transportation and installation. It features an efficient alternator and integrated control systems to ensure stable power output and safe, easy operation.

Technical Performance

Genset Power Range

5 kVA

Min Power

3000 kVA

Max Power

Alternator Power Range

6.5 kW

Min Power

2000 kW

Max Power

Alternator Type

3-Phase Brushless

Compliance & Warranty

Warranty Terms

Component	Duration	Hours
Standard Generator	1 Year	1000
Alternator Part	15 Months	1200

Certifications

CE, ISO, CQC

Design & Features

Available Configurations

- Silent / Low Noise
- Sound-proof
- Mobile / Trailer Mounted
