Product Overview

Robust Containerized Power Solution

This containerized generator set offers a self-contained, weather-resistant power solution designed for rapid deployment and easy transportation. Housed within a durable shipping container, the system is engineered for high efficiency and reliability, making it suitable for prime power, emergency backup, and peak shaving applications. It features advanced ventilation and cooling systems to ensure optimal performance in diverse industrial, commercial, and remote environments.

Technical Specifications

Frequency	50/60 Hz
Rated Speed	1500/1800 rpm
Voltage	430/220 V
Power Factor	0.8
Connection	Three phases and four lines

Components

System Components

- High-efficiency engine
- Dependable alternator
- Integrated control system
- Weather-resistant container
- Ventilation and cooling system

Certifications

Compliance & Standards	ISO 9001, ISO 14001, OHSAS 18001, IAF
