Product Overview

High-Performance Diamond Grinding Wheel

This continuous rim diamond grinding wheel is engineered for aggressive material removal and smooth finishing on demanding surfaces. Featuring a high diamond concentration and heat-treated steel bodies, it delivers exceptional durability and extended tool life. Designed for versatility, this tool supports both wet and dry grinding applications across marble, tile, concrete, and rock.

Technical Specifications

Segment Type	Continuous Rim
Body Material	#45 Steel
Process	Cold Pressed, Hot Pressed
Available Sizes	105mm - 180mm

Performance Metrics

Key Advantages

- High diamond concentration for faster cut rates
- Heat-treated steel bodies for increased durability
- Venting holes for efficient dry or wet grinding
- Suitable for heavy material removal

Compatibility & Usage

Compatible Materials

Marble • Tile • Concrete • Rock

Applicable Machines

Grinding Machines, Angle Grinders
