

Continuous Rubber Extrusion Machine

This heavy-duty rubber extruder is designed for continuous processing. It features a robust construction with a large-diameter screw and barrel assembly for high-volume output.

Product Overview

Continuous Rubber Extrusion Machine

This heavy-duty rubber extruder is engineered for high-volume, continuous processing of various rubber compounds. Built with a robust frame for industrial durability, it features a large-diameter screw and barrel assembly to ensure consistent output quality. The system includes an integrated control panel and auxiliary connection points, making it a versatile solution for professional-grade extrusion applications.

Technical Specifications

Construction Features

- Heavy-duty industrial frame
- Large-diameter screw assembly
- High-volume barrel architecture
- Perforated safety enclosure

Processing Type	Continuous
Safety Compliance	Safety Enclosure, Perforated Guarding

Operational Controls

Control System	Integrated control panel with auxiliary equipment connectivity
