

Corded Impact Drill

This corded impact drill is designed for drilling into various materials, including wood, metal, and masonry. Its impact function enables efficient drilling into hard materials like concrete and brick.

Overview

Professional Corded Impact Drill

This versatile corded impact drill is engineered for high performance across a variety of materials including wood, metal, and masonry. Featuring a robust 910W motor and variable speed control, it offers the precision and power required for demanding drilling tasks. The ergonomic design, coupled with an adjustable auxiliary handle, ensures operator comfort and enhanced control during extended use.

Technical Specifications

| | |
|-------------------|----------------------|
| Input Power | 910 W |
| Voltage/Frequency | 230V~50Hz, 120V~60Hz |
| No-load Speed | 0~2800/min |
| Impact Rate | 0-44800/min |
| Chuck Size | 13 mm |

Performance Metrics

Max Drilling Capacity

| Material | Capacity (mm) |
|----------|---------------|
| Steel | 13 |
| Concrete | 16 |
| Wood | 25 |

Features

Key Features

- Variable speed control
- Impact function for masonry
- Adjustable auxiliary handle
- Keyed chuck for secure bit retention
