

Corded Telephone with Digital Display

Corded telephone featuring a digital display for time and date. It is equipped with a standard numeric keypad and function buttons such as volume control, redial, and hands-free mode.

Overview

Reliable Corded Office Communication

This versatile corded telephone features an advanced FSK/DTMF dual system for seamless compatibility and clear call handling. Designed for professional efficiency, it includes a digital display for time and date tracking, a backlit keypad for low-light environments, and robust memory for incoming and outgoing calls. With programmable alarm clocks and a do-not-disturb function, it is an ideal communication solution for business environments.
