

Cordless Angle Grinder

This cordless angle grinder has a compact and ergonomic design and is powered by a 20V battery. The brushless motor enhances performance and durability for cutting, grinding, and polishing.

Overview

High-Performance Cordless Grinding Solution

This cordless angle grinder features a compact and ergonomic design, making it ideal for professional cutting, grinding, and polishing tasks. Powered by a 20V Li-ion battery, it provides the mobility needed for diverse job sites without the constraint of cables. The integrated brushless motor ensures enhanced performance and long-term durability for demanding applications.

Key Features

Performance Highlights

20 V

Voltage

2 Ah
