

Cordless Circular Saw with Adjustable Bevel

This cordless circular saw offers battery-powered convenience for cutting various materials. It features a high-torque motor, adjustable bevel angle, and spindle lock for easy blade changes.

Product Overview

High-Performance Cordless Cutting

This 18V cordless circular saw combines the convenience of battery portability with a high-torque motor for efficient cutting across various materials. Designed for professional use, it features an adjustable bevel for precise angled cuts and a spindle lock to facilitate quick blade changes. The durable construction and ergonomic handle ensure comfortable operation during extended tasks on the job site.

Technical Performance

Performance Highlights

18 V

Operating Voltage

4500 min{

Max No-Load Speed

Battery Voltage	18 V
Maximum Speed	4500 min{ ¹

Functional Features

Core Functionalities

- High-torque motor for efficient material removal
- Adjustable bevel angle for versatile angled cutting
- Spindle lock mechanism for easy blade replacement
- Ergonomic handle design for reduced user fatigue
- Cordless battery-powered operation for maximum portability
