

Core Drilling Machine

This core drilling machine creates precise holes in concrete, asphalt, and similar hard materials. It features adjustable settings for depth and diameter, plus a water cooling system.

Overview

Heavy-Duty Core Drilling Machine

This professional-grade core drilling machine is engineered for creating precise holes in challenging materials such as concrete and asphalt. It features a robust, stable frame and a high-performance motor designed for efficient, continuous operation. Integrated with a water cooling system to minimize dust and extend bit longevity, this tool is an essential asset for construction, plumbing, and electrical installation projects.

Technical Specifications

Compatible Materials

- Concrete
- Asphalt
- Hard construction materials

Key Features

Robust Frame • Water Cooling System • Adjustable Depth • Powerful Motor

Ideal Applications

Construction, Plumbing, Electrical Installation
