

Corrugated Flexible Cable Protection Tubes

These flexible tubes are designed to protect cables and wires. The corrugated design allows for bending and routing cables in various configurations, protecting against abrasion, moisture, and other environmental factors.

Product Overview

Professional Cable Management

These corrugated flexible cable protection tubes are engineered for high-performance wire management in professional environments. The durable construction provides essential protection against mechanical abrasion, moisture ingress, and environmental stressors. Designed for adaptability, the flexible design allows for seamless routing of cables in complex lighting or industrial systems.

Technical Specifications

Key Features

- Corrugated flexible structure
- Abrasion resistance
- Moisture protection
- High routing adaptability

Primary Applications

Lighting Systems • Industrial Wiring • Cable Routing

Color Coding

Dark Blue Body, Orange End Caps
