

Covered Hopper Railcar for Bulk Transport

This covered hopper railcar is designed for transporting bulk materials. It features a silver body with vertical support beams and a yellow top section with loading hatches.

Product Overview

High-Capacity Bulk Transport

This covered hopper railcar is engineered for the efficient, secure transport of dry bulk materials, including grain, sand, and other granular goods. The design features a robust silver body structure reinforced with vertical support beams for durability during transit. Equipped with a bright yellow loading hatch section, it ensures easy access for rapid loading while protecting contents from environmental elements.

Physical Characteristics

Car Type	Covered Hopper Railcar
Unit ID	RI 128

Key Features

Loading Mechanism

Top-Loading Hatches • Weatherproof Seal

Compatible Commodities	Grain, Sand, Dry Bulk Solids
