Overview

Versatile Crawler Excavator

This crawler excavator is engineered for high performance in gardening, orchard maintenance, farming, and basement reconstruction tasks. It features a specialized cooling system for efficiency, a robust hydraulic architecture for stable operation, and a comfortable cabin designed to reduce operator fatigue. Capable of replacing manual labor significantly, this machine offers excellent maneuverability and power for demanding job sites.

Key Features

Product Advantages

- Enhanced cooling system with separate engine and radiation space
- High-quality hydraulic system components
- Double fuel filtration system for engine protection
- Extended hydraulic lines for versatile attachment compatibility
- Ergonomic cabin with pilot control joystick

Engine & Performance

Operational Performance

56 kN

Bucket Digging Force

38 kN

Arm Digging Force

70 %

Gradeability

Engine Model	V2607
Rated Power	42.4 kW
Rated Speed	2000 rpm

Dimensions

Machine Dimensions

Dimension	Value (mm)
Overall Length	6054
Overall Width	2216
Overall Height	2672
Ground Clearance	375

Applications

Suitable Applications

Gardening, Orchard Maintenance, Farming, Basement Reconstruction, Waste Residue Carrying
