

# Crawler Mini Dumper with Hydraulic Transmission

This crawler mini dumper is designed for efficient material handling in construction and landscaping. The hydraulic transmission ensures smooth control, while the tracked design offers excellent traction on uneven terrain.

## ADDITIONAL IMAGES

## Overview

### Versatile Material Handling Solution

This crawler mini dumper is engineered for efficient material transport in challenging environments, including construction sites and mud fields. Featuring a robust hydraulic transmission system and a crawler-driven design, it offers superior traction and smooth operation. With a 600kg load capacity and self-unloading capabilities, it is designed to significantly increase productivity while reducing manual labor.

## Performance

### Load Capacity

**600 kg**  
Max Load

Lifting Height 1.6 m

Self Shovel Equipped Yes

## Technical Specifications

### Engine Options

- B&S 13.5HP 4-stroke
- HONDA GX390 13.5HP 4-stroke

Drive System Crawler driven

Hydraulic System Gear pump

Unloading Mechanism Self-unloading

## Construction

Drum Finish	Yellow powder coating
Suitable Terrains	Construction Site, Mud Field, Uneven Terrain
