

Crawler Tractor with Rotary Tiller

This crawler tractor is designed for efficient soil preparation and tillage in agricultural applications. Featuring a tracked chassis, it provides superior traction and stability on various terrains and includes a rotary tiller to effectively pulverize and mix the soil, creating an optimal seedbed.

Overview

High-Efficiency Crawler Tractor

This crawler tractor with an integrated rotary tiller is engineered for superior performance in challenging agricultural environments. Featuring a tracked chassis, it delivers exceptional adhesion and traction, making it ideal for damp, muddy, or uneven fields. Its design minimizes ground pressure to protect farmland while ensuring high-efficiency soil preparation and tillage.

Performance

Key Performance Metrics

200 1GLS

Model Series

Operational Advantages

High Horsepower, High Efficiency, Low Ground Pressure, Muddy Field Optimized, Heavy-Duty Operation

Technical Details

Terrain Suitability

- Damp environments
- Muddy fields
- Harsh terrain
- Uneven surfaces

Construction & Design

- Tracked chassis for stability
- Integrated rotary tiller
- Ergonomic operator seat
- Compact design for maneuverability
