

Crimping Pliers for Electrical Connections

These crimping pliers are designed for efficient and precise electrical connections. The leverage-enhanced handle ensures ease of use, even with larger wire sections, while the self-locking mechanism guarantees consistent crimping quality.

Product Overview

High-Performance Crimping Solution

These crimping pliers are engineered for efficient and precise electrical connections in non-welding applications. Featuring a leverage-enhanced handle design, they offer significant force reduction even when working with larger wire cross-sections. Each tool is factory-adjusted to ensure consistent, reliable, and repeatable crimping quality through accurate crimping moulds and an integrated self-locking mechanism.

Technical Specifications

Application Standard

Non-welding • Standard Electrical Connection

Mechanism

Self-locking and releasing mechanism

Leverage Design

Leverage-enhanced handle for force reduction

Model Compatibility
