

Cross Peen Hammer for Metalworking

This cross peen hammer is designed for metalworking and shaping tasks. It features a durable brass head with a cross peen on one side and a flat striking face on the other.

Product Overview

Versatile Metalworking Tool

The F02 cross peen hammer is a versatile tool designed specifically for metalworking and shaping tasks. It features a durable brass head with a dual-sided design, including a cross peen on one side and a flat striking face on the other, ensuring precise control. With a sturdy handle and balanced construction, this hammer provides efficient force transfer for riveting, bending, and forming metal, making it an essential addition to any professional workshop.

Technical Specifications

Head Material	Brass
Head Features	Cross Peen, Flat Striking Face

Usage & Applications

Primary Applications

- Metal riveting
- Metal bending
- Metal forming
- General metal shaping
