

Crosscut Hand Saw with High-Carbon Steel Blade

This crosscut hand saw is designed for cutting across the wood grain. Featuring hardened teeth and a comfortable handle, the blade is constructed from high-carbon steel for durability and long-lasting performance.

Product Overview

Professional Crosscut Hand Saw

This crosscut hand saw is precision-engineered for cutting across the wood grain, making it an essential tool for woodworking, carpentry, and general construction tasks. It features a robust high-carbon steel blade designed for superior durability and long-lasting performance. With hardened teeth for efficient cutting and an ergonomic handle designed for extended use, this tool provides the reliability required for demanding professional applications.

Technical Specifications

Blade Material	High-Carbon Steel
Primary Application	Crosscut (across wood grain)

Features

Key Features

- Hardened teeth for efficient cutting
- Ergonomic handle for extended use
- High-carbon steel construction
- Optimized for woodworking and carpentry

Suitable For	Woodworking, Carpentry, Construction
