

CRT Television with Grey Bezel

This is a cathode ray tube (CRT) television with a grey bezel. The TV features a rectangular screen surrounded by a thick black frame.

Product Overview

Professional CRT Display Solution

This traditional CRT television features a robust grey bezel design, offering a classic display solution for specialized industrial or retro-compatible applications. Built with a solid rectangular frame and integrated front-panel control interface, it provides a stable and reliable visual output. Its neutral grey aesthetic ensures it fits seamlessly into existing workstation or technical setups requiring cathode ray tube technology.
