Product Overview

Versatile Agricultural Tiller

This multi-functional cultivator and ditching machine is engineered for efficient soil preparation, including ditching, earthing up, and tilling. Featuring a 225cc engine and a high-efficiency Poly V-belt transmission system, it delivers powerful performance with minimal energy loss. The machine is designed with operator safety and stability in mind, utilizing counter-rotating wheels and blades, along with CE-compliant transmission components.

Technical Specifications

Engine Displacement	225 cc
Transmission Type	Poly V-belt
Safety Standards	CE Certified

Operational Features

Key Operational Features

- Reverse gear safety interlock (PTO disabled)
- Separated clutch control for walking wheels
- Adjustable cutting depth via front wheel
- Counter-rotating blades and wheels for stability

Compatibility & Attachments

Ditching blades • Earthing up blades • Iron wheels for hard/slipping soil

Handle Rotation	360 degrees
