

Curved Glass Stainless Steel Range Hood

This range hood features a curved glass canopy and stainless steel construction. It is equipped with multi-speed fan, halogen lighting, and easy-to-clean filters for efficient ventilation.

Product Overview

Modern Kitchen Ventilation

This curved glass stainless steel range hood combines aesthetic appeal with high-performance ventilation. Engineered for efficiency, it features a robust 160W motor capable of delivering an air volume of 680m³/H. With dual halogen lighting and versatile speed settings, it provides a clean, well-lit environment for professional and residential kitchens alike.

Technical Specifications

Key Performance Metrics

680 m³/H

Air Volume

160 kW
