

Curved Stainless Steel Scraper with Ergonomic Handle

This scraper features a wide, curved stainless steel blade. Its black and blue ergonomic handle includes a hole for easy storage.

Product Overview

Professional Grade Scraper

This high-performance scraper is engineered for demanding tasks, featuring a precision-forged stainless steel blade designed for high hardness and exceptional toughness. The curved blade geometry combined with a hammerable construction allows for versatile use in professional environments. The ergonomic handle ensures comfort during extended use, while the overall build quality guarantees resistance to deformation and breakage.

Technical Specifications

Blade Material	Stainless Steel
Performance Features	Hammerable, Non-deformation, Precision-forged, High Hardness, High Toughness

Design & Utility

Design Features

- Ergonomic handle for comfortable grip
- Curved blade profile for efficient scraping
- Smooth edge finish
- Integrated hanging hole for convenient storage
