

Customizable Hydraulic Crawler Carrier

This hydraulic crawler carrier is designed for customized applications and features a robust crawler system for superior traction on various terrains. The hydraulic system provides efficient power for operation and control.

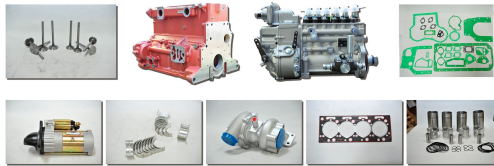

ADDITIONAL IMAGES

Product Overview

GENUINE PARTS

A wide range of genuine maintenance components is available for long-term reliability.

Versatile All-Terrain Transport Solution

The DX750 is a compact hydraulic crawler carrier designed for high-efficiency transportation in challenging environments like agriculture and construction. Its new, streamlined design ensures easy installation and convenient transport between job sites. Equipped with durable engineering rubber tracks and a mechanical transmission, it provides reliable traction and stability across diverse terrains.

Performance Metrics

Key Performance Metrics

11 HP

Engine Power

8 KW

Rated Power

380 KG

Machine Weight

Technical Specifications

Mechanical transmission system with multi-speed gear selection for various load conditions.

Three-speed forward and reverse gear configuration allows for adaptable walking speeds.

Engine Type	11HP Diesel Engine
Walking Speed	5-12km/h
Drive Way	Mechanical transmission
Gear System	Top three down one (3 Forward + 1 Reverse)

Dimensions & Capacity

Trunk Dimensions	1250 * 750 * 430 mm
Overall Machine Size	1900 * 750 * 1200 mm
Ground Contact Length	1200 mm

Chassis & Mobility

Track Material

Engineering Rubber Track • Agriculture Grade

Terrain Compatibility

All-Terrain, Crawler System, High Traction, Compact Design

Operational Controls

Intuitive control layout featuring steering levers, clutch, and braking for precise maneuverability.

Operator Interface

- Left and Right Steering Levers
- Manual Clutch
- Brake System
- Adjustable Speed Throttle
- Gear Shift Lever

Compliance & Quality

Standards & Compliance	ISO 9001:2015, CE, Machinery Directive 2006/42/EC, GB/T19001-2016
------------------------	---

PACKING

Professional export-grade packaging ensures the vehicle arrives in perfect condition.

Export Packaging

- Wooden crate protection
- Silica gel desiccant for moisture control
- Protective plastic sheeting
- Containerized shipping ready
