

Cylindrical LED Lighting Elements

Cylindrical LED lighting elements designed for various applications. Available in white, blue, green, and red colors, these lights are suitable for decorative or signaling purposes.

Product Overview

Professional Cylindrical Lighting Solutions

These cylindrical LED lighting elements are designed for versatile integration within engineering, signaling, or decorative lighting systems. Featuring a modular, parallel array design, the units support multi-color output including white, blue, green, and red. They offer a reliable lighting solution suitable for complex telecommunications or professional technical environments.

Technical Features

Typical Applications

- Telecommunications signaling
- Engineering status indicators
- Decorative lighting arrays

Available Colors	White, Blue, Green, Red
Shape	Cylindrical
