Product Overview

Efficient LED Lighting Solution

This cylindrical LED tube light is designed as a high-performance, energy-efficient replacement for traditional fluorescent tubes. It offers versatile brightness control directly through your existing on/off switch, requiring no additional hardware or complex installations. With a long operational lifespan of 15,000 hours, it provides consistent, bright illumination suitable for industrial, commercial, and residential environments.

Technical Specifications

Power	24 W
Luminous Efficacy	90-120 lm/w
Voltage	185-265V
Base Type	G13
Rated Life	15000 Hours

Features

Dimming Control

- Switch-based control
- No extra hardware required
- 0-60% brightness in <1 second
