

Cylindrical Portable Speaker

This is a portable speaker with a cylindrical design. It is designed for audio output for use with computers or other electronic devices.

Product Overview

Compact Cylindrical Speaker Design

This cylindrical portable speaker features a robust black textured body paired with a sleek silver metal mesh end cap. Housed within a durable plastic frame with unique ridged detailing, it is engineered for clear audio output. Its compact design makes it an ideal solution for integration with computers and various portable electronic devices.
