

D140B20 Stock Bore Sprocket

This D140B20 sprocket features a stock bore for secure mounting. With 20 teeth and a 12.1" outside diameter, it is suitable for various power transmission applications.

Product Overview

D140B20 Stock Bore Sprocket

The D140B20 is a robust, Type B sprocket designed for reliable power transmission in industrial machinery and conveyor systems. Featuring a 20-tooth configuration and a precision-engineered stock bore, this component ensures consistent engagement and durability under demanding operational conditions. It is built to accommodate a variety of mechanical setups, offering flexibility for customization with a recommended maximum bore capacity.

Key Metrics

Tooth Count	20
Sprocket Type	B

Dimensions

Outside Diameter	12.1 in
Hub Diameter	7 in
Length Thru Bore	4 in

Bore Specifications

Stock Bore Size	1.75 in
Recommended Maximum Bore	5.25 in
