

Data Storage Tapes and Disks

Data storage tapes and disks are used for recording and storing data. They are suitable for various electronic applications.

Overview

Professional Data Storage Solutions

These high-capacity data storage tapes and disks are designed for enterprise-grade archival and backup requirements. Engineered for long-term data integrity and reliability, they provide a secure medium for critical business information. This product line supports high-density storage needs, ensuring efficient data management for professional IT infrastructures.

Technical Specifications

Performance Highlights

12 TB

Native Capacity

300 MB/s

Transfer Rate

Media Types

Magnetic Tape, Optical Disk, High-Density Storage

Compliance and Standards

Certifications

ISO 9001 • RoHS Compliant • CE Certified

Compatibility

Compatible Drive Types

- LTO-8 Drives
- LTO-7 Drives
- Enterprise Tape Libraries
- Optical Jukebox Systems

Environmental Requirements

Operating Environment

Parameter	Range
Operating Temperature	10°C to 45°C
Relative Humidity	20% to 80%
