

Data Transmission Modem Modules

These modem modules are designed for integration into electronic devices. They facilitate signal processing and data transmission within communication systems.

Product Overview

Data Transmission Modem Modules

These versatile data transmission modem modules are designed for seamless integration into electronic communication systems. Featuring robust metal housings and standardized coaxial connectors, they ensure reliable signal processing and connectivity. The modules are engineered for professional applications requiring stable data transmission performance.

Technical Specifications

Available Module Variants

- MBM-13
- MBM-01
- MBM-07
- MBM-15

Design Features

Metal Housing, Coaxial Connectors, Pin Array Integration

Inventory Details

Manufacturing Batch Data

Model ID	Batch/Serial Number
MBM-13	200406141
MBM-01	200406012
MBM-13	200406021
MBM-07	200405046
MBM-15	200406021
