

DC Inverter Arc Welder ARC200

This DC inverter arc welder is compact and portable, designed for diverse welding applications. It features adjustable amperage control for precise welding of mild steel, stainless steel, and other ferrous metals.

Overview

Compact DC Inverter Arc Welder

The ARC200 is a compact and portable DC inverter arc welder engineered for versatility across various welding applications. It features precise adjustable amperage control, making it suitable for welding mild steel, stainless steel, and other ferrous metals. Designed for reliability, the unit includes thermal overload protection and a lightweight build with an integrated carrying handle for easy transport to different job sites.

Technical Specifications

Safety Features

Thermal Overload Protection

Design Features

- Compact design
- Portable with carrying handle
- DC Inverter technology
- Adjustable amperage control

Suitable Materials

Mild Steel, Stainless Steel, Ferrous Metals
