

DC Portable Gasoline Generator

This DC gasoline generator is designed for silent operation and portability. It features a switch for manual, recoil, and automatic start modes, along with an oil alert output indicator and a DC 24V output.

Product Overview

High-Efficiency DC Power Solution

This portable gasoline generator is engineered for reliable, silent DC charging and powering demanding applications like DC air conditioning for heavy-duty trucks. It features advanced variable frequency technology for stable output with a Total Harmonic Distortion (T.H.D) of 3% or less. The unit combines a lightweight, portable design with impressive fuel efficiency to ensure lasting energy savings in the field.

Performance Metrics

Featured Performance

2300 W Starting Wattage	1800 W Running Wattage	3 % THD Level
-----------------------------------	----------------------------------	-------------------------

Technical Specifications

DC Output	24V
Oil Capacity	0.38L - 0.4L
Recommended Oil	SAE 10W-30

Features

Startup Options

- Manual Start
- Recoil Start
- Automatic Start (Low Voltage Trigger)

Safety and Monitoring

Oil Alert Indicator • Voltage Stabilization

Key Features

Ultra Silent, Fuel Saving, Low Emission, Parallel Capable, Variable Frequency
