

Deep Hole Drilling Machine

This gun drilling machine is designed for precision deep hole drilling applications. It features a robust construction for stability and accuracy.

Product Overview

Precision Deep Hole Drilling

This gun drilling machine is engineered specifically for high-precision deep hole drilling applications. Built with a robust construction, it ensures maximum stability and accuracy during operation. The machine is an ideal solution for manufacturing complex components, including molds, dies, and hydraulic parts that require deep and precise holes.

Technical Features

Key Features

- Robust construction for stability
- Integrated worktable for secure workpiece placement
- Advanced coolant system for chip removal
- Temperature control during drilling

Applications

Suitable Industries

Mold Manufacturing, Die Making, Hydraulic Components
