

Demolition Hammer

This demolition hammer is designed for heavy-duty work, delivering exceptional breaking power on concrete and asphalt. Its ergonomic design and vibration reduction technology ensure comfortable operation and reduced user fatigue.

Product Overview

High-Performance Demolition Solution

The Z1G-HB-1304 Demolition Hammer is a powerful and robust tool engineered specifically for heavy-duty demolition tasks. It features a high-impact mechanism that delivers exceptional breaking power, making it highly effective for penetrating concrete, asphalt, and other tough materials. Designed with the professional in mind, it incorporates vibration reduction technology and an ergonomic layout to ensure comfortable operation and reduced fatigue during extended use.

Performance

Performance Highlights

1304

Model Series

Impact Mechanism

High-impact mechanism for exceptional breaking power

Design & Ergonomics

Ergonomic Design

- Vibration reduction technology
- Ergonomic handle design
- Reduced user fatigue during heavy-duty tasks

Chuck System

Durable chuck for secure bit retention and easy changes

Applications

Professional Applications

Construction • Demolition • Renovation

Suitable Materials

Concrete, Asphalt, Masonry, Tough Construction Materials
