

Depressed Center Abrasive Cutting Wheel

This depressed center cutting wheel is engineered for metal cutting. It has dimensions of 230x3x22mm (9"x1/8"x7/8") and a maximum RPM of 6600.

Product Overview

Professional Metal Cutting Performance

This depressed center abrasive cutting wheel is engineered for high-efficiency metal cutting applications. Designed for durability and precision, it meets rigorous safety standards for professional industrial use. Its robust construction ensures consistent performance across various metal fabrication tasks.

Technical Specifications

Abrasive Grain Type	42-A30P4BF2
Max Operating Speed	80 m/s
Maximum RPM	6600

Dimensions

Dimensions (Metric)	230 x 3 x 22 mm
Dimensions (Imperial)	9" x 1/8" x 7/8"

Compliance & Standards
